TITLE : ELECTRONIC MAIL SYSTEM AND
RECORDING MEDIUM STORING
ELECTRONIC MAIL SYSTEM
PROGRAM

ABSTRACT : PROBLEM TO BE SOLVED: To facilitate a job by a sender in cancellation processing by preventing a recipient from reading an undesired mail in the electronic mail system where mails are communicated via a server.

SOLUTION: A main processing means 1a of a server 1 stores a mail sent from a sender side client 2 to a mail storage means 1b. Furthermore, the mail processing means 1a provides a mail corresponding to a mail storage means 1b in response to a request from a receiver side client 3. When the sender side client 2 makes a cancellation request of a mail having already been sent, a cancel processing means 1c deletes a corresponding mail in the mail storage means 1b when the receiver side client 3 does not open the mail subject to cancellation request.
